SUSTAINABILITY CONCEPT

FARM TO TABLE

"Farm-to-Table" means that the food on the table came directly from a specific farm, without going through a store, market, or distributor along the way. We have 2 outlets in the property utilizing fresh and organic vegetables which comes from local suppliers located in Bedugul and Tabanan area. Those suppliers also raising organic chicken and pig. And in the property itself, we have a small organic garden which could support small amount of our herbs, edible flower and vegetable needs

NOSE TO TAIL

"Nose-to-tail cooking is all about sustainability. In our case, is to utilize all part of meat that we purchased from supplier. As a sample crispy fish skin that served in Seasalt and rilette that we served in Beach Bar are made from all meat and fish trimmed.

LOCAL PRODUCE

"Working with neighboring fishermen and local suppliers, to seek out the finest seafood in the region as well as local produce. Fresh, natural and organic is the essence of the cuisine, allowing the natural flavors of the ingredients to express themselves. All our vegetable come from Bedugul, one of the region in Bali.

Here at Seasalt, dishes are seasoned with traditional organic Kusamba sea salt from East Bali, where a small community of salt farmers continues a centuries-old tradition of producing 100% natural salt by sun and wind evaporation.

The Hyatt logo is centered on a dark blue background. It features the word "HYATT" in a white, uppercase, sans-serif typeface. A white, curved line, resembling a stylized arc or a bridge, is positioned beneath the letters "Y", "A", and "T", starting under the "Y" and ending under the "T".
